1 Change Request Form

CHANGE-REQUEST FORM			
Project Name:	IslandFurniture System	Project Sponsor:	CFO
		Urgency:	High
Change Request #:	Originator:	Change requested by:	Date requested:
1002	Roger Wong	Magdalene Lim	4 Jan 2021
Description of Change Request #:			
<p>Our customers feedbacked that they encountered problems when using the following functions:</p> <ol style="list-style-type: none"> 1) Login & viewing of User Profile 2) Edit User Profile including change password. 3) Sales History. 4) Show all furniture by category. 5) Show all retail products by category. 6) Show description of the selected furniture in product details. 7) Show description of the selected retail product in product details. <p>Key Functional Requirements:</p> <ol style="list-style-type: none"> 1. If the log-in credentials are entered correctly, the user should see the User Profile page with the name of the user displayed at the top right of the screen. 2. User Profile page should display the personal particulars of the logged-in user. 3. Editing User Profile should allow user to change password <u>if user chooses to</u>. 4. Sales History to display a list of orders made by the logged in user and each order should display the items purchased. 5. When the user clicks on a furniture category, it displays all the furniture available. 6. When the user clicks "retail products", it displays all the retail products available. 7. When the user clicks on "more details" of a <i>furniture</i>, the description, price , name and item availability. 8. When the user clicks on "more details" of a <i>retail product</i>, the description, price , name and item availability. 			
Reason for Change:			
Functions not working according to expectation.			
Proposed Approach to Resolve:			
N.A.			

2 Product Backlog

Priority	Items	Effort
1	As a scrum team , we need to do effort estimation to determine the size of the task.	3
2	As a scrum team, we need to create the work time available for both our sprints,	0.5
3	As a scrum team we need to create a scrum board to track the progress of the team	3
4	As a scrum team, we need to create 3 user story cards , Logging and viewing of the User Profile, editing of user profile including change password for and sales history reference material.	3
5	As a scrum team, we need to create use case specification for login and viewing user profile, editing user profile including change password and sales history for reference material.	3
6	As a scrum team we need to complete test case for Logging and viewing of the User Profile to determine if different features within the system are performing as expected and to confirm that the system satisfies all related standards, guidelines, and customer requirements of the test case.	3
7	As a scrum team we need to complete the test case for editing of user profile including change password to determine if different features within a system are performing as expected and to confirm that the system satisfies all related standards, guidelines and customer requirements	4
8	As a scrum team we need to complete the test case for sales history to determine if different features within a system are performing as expected and to confirm that the system satisfies all related standards, guidelines, and customer requirements	3
9	As a scrum team we need to create sequence diagrams for the login and viewing user profile, editing user profile including change password and sales history in the change request form	5
10	As a scrum team we need to create a new GitHub repository so that the team can collaborate on the debugging of Island Furniture	2
11	As a Member, I want to view my profile so that I can check my info.	8
12	As a Member, I want to edit my profile so that I can change my personal information and password	10
13	As a Member, I want to view my sales history so that I can view my product details.	6
14	As a scrum team we need to create burndown charts for sprint 1 and 2	2

15.	As a scrum team, we want to check if there are other functions that needs to be debugged	6
-----	--	---

3 Test Cases

Project Name: IslandFurniture

3.1 Test Case 1

Test Case ID: 1
Test Priority (Low/Medium/High): High
Module Name: Software Engineering Practice
Test Title: Login & Viewing User Profile
Description: This test intends to verify the authentication of the login function and the display of personal particulars

Test Designed by: Genevivi, Kanchana,Sakshi
Test Designed date: 6 th July 2023
Test Executed by: Genevivi, Kanchana,Sakshi
Test Execution date: 8 th July 2023

Pre-Conditions: Registered Account Credentials . MySQL database of Island furniture

Dependencies: Jwt token , node modules(npm) , Mysql

Step	Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)	Notes
1	Click on "Login/Register" tab on the websites index.html page.		Upon click, user is directed to login and register page at http://localhost:8081/B/S	Upon click, user is successfully directed to login and register page at http://localhost:8081/B/S G/memberLogin.html.	pass	

2	<p>Authenticate with <u>correct</u> email and <u>correct</u> password to login as a member to gain access to the various online shopping-related function available</p>	<p>1.Email (junwei10255@gmail.com) 2.Password (junwei123)</p>	<p>User can log in with their credentials upon click of “Login” button and are directed to http://localhost:8081/B/SG/memberProfile.html. The page lets logged in users view their personal information, sales history and loyalty.</p>	<p>User is able to log in successfully with their credentials upon click of “Login” button and are directed to http://localhost:8081/B/SG/memberProfile.html. The page lets logged in users view their personal information, sales history and loyalty.</p>	pass	<p>1.User has to fill in email address. User has to fill in password 2.User can press lost password to recover their password 3.After login , “Welcome {username}” will be shown</p>
3	<p>Authenticate with <u>wrong</u> email and <u>correct</u> password to login as a member to gain access to the various online shopping-related function available</p>	<p>1.Email (junwei10255@gmail.com) 2.Password (junwei123)</p>	<p>User is not able to log in with their credentials upon click of “Login” button and are not directed to User Profile http://localhost:8081/B/SG/memberProfile.html. (user profile page)</p>	<p>User is unsuccessful to log in successfully with their credentials upon click of “Login” button and are not directed to http://localhost:8081/B/SG/memberProfile.html. User is unable to log in with their credentials upon click of “Login” button and are not directed to</p>	pass	

4	<p>Authenticate with <u>correct</u> email and <u>wrong</u> password to login as a member to gain access to the various online shopping-related function available</p>	<p>1.Email (junwei10255@gmail.com) 2.Password (junwei1234567)</p>	<p>User is not able to log in with their credentials upon click of “Login” button and will not be directed to User Profile http://localhost:8081/B/SG/memberProfile.html User is not able to log in with their credentials upon click of “Login”</p>	<p>User is unsuccessful to log in successfully with their credentials upon click of “Login” button and are not directed to User Profile http://localhost:8081/B/SG/memberProfile.html. User is unable to log in with their credentials upon click of “Login” button and are not directed to User Profile</p>	pass	
5	<p>Authenticate with <u>wrong</u> email and <u>wrong</u> password to login as a member to gain access to the various online shopping-related function available</p>	<p>1.Email (junwei10255@gmail.com) 2.Password (junwei1234567)</p>	<p>User is unable to log in with their credentials upon click of “Login” button and are not directed to User Profile http://localhost:8081/B/SG/memberProfile.html. (user profile page)</p>	<p>User is unable to log in with their credentials upon click of “Login” button and are not directed to User Profile http://localhost:8081/B/SG/memberProfile.html. (user profile page)</p>	pass	

6	View personal information by on click of “Overview” tab at the User Profile page of logged in user	1.Name 2. Email 3.Phone 4.Country 5.Address 6.Set Challenge Question and Answer 7.Age 8.Income	Logged in user should be able to view the personal particulars as it should be displayed by the website.	<div>Before: Logged in user is not able to view the personal particulars as the website is not displaying the personal</div> <div>After: Logged in user can view the personal particulars successfully as the website is displaying the personal</div>	<div>Before: fail</div> <div>After: Pass</div>	
7	View loyalty programme by on click of “Loyalty Programme” tab at the User Profile page of logged in user.		Logged in user should be able to view their loyalty programme as it should be displayed by the website.	Logged in user is successfully able to view their loyalty programme as it is displayed by the website.	pass	
8	View sales history by on click of “Sales” tab at the User Profile page of logged in user.		Logged in user should be able to view their sales history as it should be displayed by the website.	Logged in user is successfully able to view their <i>sales history</i> as it is displayed by the website.	pass	

Post-conditions:

Nil

3.2 Test Case 2

Test Case ID: 2
Test Priority (Low/Medium/High): Medium
Module Name: Software Engineering Practice
Test Title: Edit User Profile including change password
Description: This test intends to confirm that the password can only be changed when the user intends to change only.

Test Designed by: Genevivi, Kanchana,Sakshi
Test Designed date: 7th July 2023
Test Executed by: Genevivi, Kanchana,Sakshi
Test Execution date: 9th July 2023

Pre-Conditions: Registered Account Credentials . MySQL database of Island furniture
Dependencies: Jwt token , node modules(npm) , Mysql, bcrypt

Step	Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)	Notes
1	Update name by filling in the field and click on submit button	Name	After on click of submit button, logged in user should be able to view their updated name	<div> <p>Before: After onclick of submit button, logged in user is not able to update their personal particulars. Hence, they are not able to view the updated name</p> </div> <div> <p>After: After onclick of submit button, logged in user is able to update their personal particulars successfully Hence, they able to view the updated name</p> </div>	<div> <p>Before: fail</p> </div> <div> <p>After: Pass</p> </div>	

2	Update phone number by filling in the field with words and click on submit button	Phone number	After on click of submit button, website should prompt user that letters are not allowed	After onclick of submit button, logged in user is not able to update their personal particulars , website prompts user to put numbers only in the phone number field	pass	
3	Update phone number by filling in the field with numbers and click on submit button	Phone number	After on click of submit button, logged in user should be able to view their updated phone number	<div>Before: After onclick of submit button, logged in user is not able to update their personal particulars. Hence they are not able to view the updated phone number</div> <div>After :After onclick of submit button, logged in user is able to update their personal particulars. Hence they are able to view the updated phone number</div>	<div>Before: fail</div> <div>After: Pass</div>	

3	Update country by clicking the picker, choosing the country then click on submit button	Country	After on click of submit button, logged in user should be able to view their updated country	<div>Before After: After onclick of submit button, logged in user is able to update their personal particulars. Hence they are not able to view the updated country</div> <div>After: After onclick of submit button, logged in user is able to update their personal particulars. Hence they are able to view the updated country</div>	<div>Before: fail</div> <div>After: Pass</div>	
4	Update address by filling in the address field with the new address, and click on submit button.	Address	After on click of submit button, user should be able to view their updated address .	<div>Before After: After onclick of submit button, logged in user is NOT able to update their personal particulars. Hence they are not able to view the updated address</div> <div>After: After onclick of submit button, logged in user is able to update their personal particulars. Hence they are able to view the updated address</div>	<div>Before: fail</div> <div>After: Pass</div>	

5	Update challenge question by clicking the picker, choosing the question then click on submit button		After on click of submit button, user should be able to view their updated challenge question .	<div>Before: After onclick of submit button, logged in user is not able to view their updated challenge question.</div> <div>After: After onclick of submit button, logged in user is able to view their updated challenge question.</div>	<div>Before: fail</div> <div>After: Pass</div>	
6	Update challenge answer by filling in the challenge answer field with the new answer and click on submit button.	Challenge Answer	After on click of submit button, user should be able to view their updated challenge answer	<div>Before After: After onclick of submit button, logged in user is not able to view their updated challenge answer.</div> <div>After: After onclick of submit button, logged in user is able to view their updated challenge answer.</div>	<div>Before: fail</div> <div>After: Pass</div>	

7	Update age by filling in the field with words and click on submit button		After on click of submit button, website should prompt user that letters are not allowed.	After onclick of submit button, logged in user is not able to update their personal particulars , website prompts user to put numbers only in the age field	pass	
8	Update age by filling in the field with numbers and click on submit button	Age	After on click of submit button, logged in user should be able to view their updated age .	<div>Before: After onclick of submit button, logged in user is not able to update their personal particulars. Hence they are not able to view the updated age</div> <div>After: After onclick of submit button, logged in user is able to update their personal particulars. Hence they are not able to view the updated age</div>	<div>Before: fail</div> <div>After: Pass</div>	
9	Update income by filling in the field with words and click on submit button		After on click of submit button, website should prompt user that letters are not allowed	After onclick of submit button, logged in user is not able to update their personal particulars , website prompts user to put numbers only in the income field	pass	

10	Update income by filling in the field with numbers and click on submit button	Income	After on click of submit button, logged in user should be able to view their updated income	<p>Before : After onclick of submit button, logged in user is not able to update their personal particulars. Hence they are not able to view the updated income</p> <p>After : After onclick of submit button, logged in user is able to update their personal particulars. Hence they are not able to view the updated income</p>	<p>Before: fail</p> <p>After: Pass</p>	
11	Change password only by clicking on submit button and re login with new password to enter the account	1. Old password 2. New password	After on click of submit button, the password should have changed successfully. Logged in user should be redirected to login page to login with their new password.	<p>Before: After on click of submit, logged in user is not able to change password successfully as the website does not allow user to submit their updated changed password without filling in the personal particulars.</p> <p>After: After on click of submit, logged in user is able to change password successfully as the website allow user to submit their updated changed password without filling in the personal particulars.</p>	<p>Before: fail</p> <p>After: Pass</p>	

12	Change one or more personal particulars only (can only be tested after personal particulars of user are displayed	Any one or more of these attributes can be filled in: 1.Name 2. Email 3.Phone 4.Country 5.Address 6.Set Challenge Question and	After on click of submit button, the attributes should have changed successfully.	<div>Before: After on click of submit button, the attributes did not change successfully.</div> <div>After: After on click of submit button, the attributes changed successfully.</div>	<div>Before: fail</div> <div>After: Pass</div>	
13	Change both personal particulars and password at the same time	Any one or more of these attributes can be filled in: 1.Name 2. Email 3.Phone 4.Country 5.Address 6.Set Challenge Question and 1. Old password 2. New password	After on click of submit button, both the personal particulars and password should have changed successfully.	<div>Before :After on click of submit button, both the personal particulars and password did not change successfully.</div> <div>After: After on click of submit button, both the personal particulars and password changed successfully.</div>	<div>Before: fail</div> <div>After: Pass</div>	

3.3 Test Case 3

Test Case ID: 3
Test Priority (Low/Medium/High): Low
Module Name: Software Engineering Practice
Test Title: Sales History
Description: This test intends to confirm that all the sales history of the user is visible on the Sales History page.

Test Designed by: Genevivi, Kanchana,Sakshi
Test Designed date: 7th July 2023
Test Executed by: Genevivi, Kanchana,Sakshi
Test Execution date: 9th July 2023

Pre-Conditions: Registered Account Credentials . MySQL database of Island furniture
Dependencies: Jwt token , node modules(npm) , MySQL

Step	Test Steps	Test Data	Expected Results	Actual Results	Status (Pass/Fail)	Notes
1	View Sales History by clicking on "Sales History"	1. Order number 2. Date purchased 3. Estimated delivery date 4. address 5. postal code 6. name 7. contact number 8. product 9. total amount spent	After on click of "Sales History" tab, user should be able to see all previous orders they have made	<div> Before: After on click of "Sales History" tab, user can only see the first order they have made. </div> <div> After: After on click of "Sales History" tab, user can only see all the orders they have made. </div>	<div> Before: fail </div> <div> After: Pass </div>	

2	After user purchases an item, user can check sales history by clicking on sales history button.	<ol style="list-style-type: none"> 1. Order number 2. Date purchased 3. Estimated delivery date 4. address 5. postal code 6. name 7. contact number 8. product 9. total amount spent 	After on click of “Sales History” tab, user should be able to see the order they have just placed.	<p>Before: After on click of “Sales History” tab, user can only see the first order they have made and not the order they just made. Hence the sales history is not being updated on the frontend of the website,</p> <p>After: After on click of “Sales History” tab, user can see all the orders they have made.</p>	<p>Before: fail</p> <p>After: Pass</p>

Find out the pre-condition and post-conditions 2. Find the dependencies 3. The description of the test case. 4. Testing the function by testing the website	Effort:3 Reason: 1. fulfil pre-conditions before doing the test case 2. do the testing 3. document the results of the test	Effort: Reason:3 1. Identify different test steps 2. Document the test case 3. Launch website and test the functions of the website 4. See what pre and post conditions are needed	Effort:3 Reason: 1. List down the pre-condition and post-conditions 2. Find out the dependencies and libraries used. 3. Testing the website find the errors. 4. Conduct white-box testing to find error of the functions.	Effort:3 Reason: 1. black box and white box testing 2. document any errors	Effort: Reason:	Effort: Reason:	Effort: Reason:	3
11	As a Member, I want to view my profile so that I can check my info.	Effort: Reason:8 1. Identify page that is not working properly 2. Inspect page to see error	Effort: Reason: 1. Look through the code of 'islandfurniture' 2. Inspect the specific page	Effort: 7 Reason: 1. identify the parts of code in the files that are for viewing of profile 2. inspect the codes to see	Effort: Reason:8 1. Identify page that is not working properly 2. Inspect page to see error	Effort: 8 Reason: 1. Need to debug the bug to produce expected results which is the member should be	Effort:8 Reason: 1. identify the parts of code in the files that are for viewing of profile 2. inspect the codes to see	Effort: Reason:	Effort: Reason:	Effort: Reason:	8h

		3. Look at the code to identify the faults 4.Run to check if modified code works 5. Commit the change into github	to find out the bug 3. Run the code and at the same time test the website to find the specific bug need to be debugged	where the error arises 3. fix the error 4. check if the fix worked and error is gone	3. Look at the code to identify the faults 4.Run to check if modified code works 5. Commit the change into github	able to view their profile and the info. 2. Need to test debugged code to see whether the code is working as expected and giving expected results in frontend	where the error arises 3. fix the error 4. check if the fix worked and error is gone 5. check if any other error arised				
12	As a Member, I want to edit my profile so that I can change my personal information and password	Effort:10 Reason: 1. After successful login the member has to be redirected to the user profile page to even edit the profile page 2. Check the codes for the bug 3. Commit changes	Effort:10 Reason: 1. Look through the code of 'island furniture' 2. Inspect the specific page to find out the bug 3. Run the code and at the same time test the website to find the specific bug need to be debugged	Effort: 10 Reason: 1. 1. identify the parts of code in the files that are for viewing of profile. 2. inspect the codes to see where the error arises 3. fix the error 4. check if the fix worked and error is gone	Effort:10 Reason: 1. After successful login the member has to be redirected to the user profile page to even edit the profile page 2. Check the codes for the bug 3. Commit changes	Effort:10 Reason: 1. Need to debug the bug to produce expected results which is the member should be able to edit their profile and the info. 2. Need to test debugged code to see whether the code is working as expected and giving expected results in frontend	Effort: 10 Reason: 1. identify the parts of code in the files that are for viewing of profile 2. inspect the codes to see where the error arises 3. fix the error 4. check if the fix worked and error is gone 5. check if any other error arises	Effort: Reason: 1. After successful login the member has to be redirected to the user profile page to even edit the profile page 2. Check the codes for the bug 3. Commit changes	Effort:10 Reason: 1. Need to debug and check whether the member can change password without editing their other fields such as name and etc. 2. Check whether the member can change on or more detail and can successfully submit. 3. check database to ensure the changed fields are changed upon the request submitted	Effort: 10 Reason: 1. identify the parts of code in the files that are for viewing of profile 2. inspect the codes to see where the error arises 3. fix the error 4. check if the fix worked and error is gone 5. check if any other error arised	10 h

13	As a Member, I want to view my sales history so that I can view my product details.	Effort:6 Reason: 1. Identify page that is not working properly 2. Inspect page to see error 3. Look at the code to identify the faults 4. Run to check if modified code works 5. Commit the change into github	Effort:6 Reason: 1. Look through the code of 'islandfurniture'. 2. Inspect the specific page to find out the bug 3. Run the code and at the same time test the website to find the specific bug need to be debugged	Effort: 6 Reason: 1. identify the parts of code in the files that are for viewing of profile 2. inspect the codes to see where the error arises 3. fix the error 4. check if the fix worked and error is gone	Effort:6 Reason: Identify page that is not working properly 2. Inspect page to see error 3. Look at the code to identify the faults 4. Run to check if modified code works 5. Commit the change into github	Effort:6 Reason: 1. Need to debug the bug to produce expected results which is the member should be able to edit their profile and the info. 2. Need to test debugged code to see whether the code is working as expected and giving expected results in frontend	Effort:7 Reason: 1. identify the parts of code in the files that are for viewing of profile 2. inspect the codes to see where the error arises 3. fix the error 4. check if the fix worked and error is gone 5. check if any other error arised	Effort: Reason:	Effort: Reason:	Effort: Reason:	6h
4	As a scrum team, we need to create 3 user story cards , Logging and viewing of the User Profile, editing of user profile including change password and sales history reference material.	Effort:2 Reason: 1. make user story card. 2. Identify acceptance criteria and notes	Effort:3 Reason: 1. 3 user story cards are created to identify the purpose, actor, acceptance criteria and additional notes to aid in testing	Effort: 3 Reason: 1. make 3 user story 2. identify the acceptance criteria	Effort:2 Reason: 1. make user story card. 2. Identify acceptance criteria and notes	Effort:3 Reason: 1. 3 user story cards are created to identify the purpose, actor, acceptance criteria and additional notes to aid in testing	Effort: 3 Reason: 1. make 3 user story 2. identify the acceptance criteria	Effort: Reason:	Effort: Reason:	Effort: Reason:	3
-	As a scrum team we need to create a product backlog	Effort: Reason: 1. Identify highest to lowest priority. 2. Identify time taken.	Effort:2 Reason: 1. Need to determine the priority of the backlog items. 2. List down the product backlog from	Effort: 3 Reason: 1. identify all the things that need to be in the product backlog 2. decide on the priority	Effort: 2 Reason: 1. Identify highest to lowest priority. 2. Identify time taken.	Effort:2 Reason: 1. Need to determine the priority of the backlog items. 2. List down the product backlog from	Effort: 3 Reason: 1. identify all the things that need to be in the product backlog 2. decide on the priority	Effort: Reason:	Effort: Reason:	Effort: Reason:	2

			the highest priority to the lowest. 3. List down the time taken	3. decide on how much effort each task requires		the highest priority to the lowest. 3. List down the time taken	3. decide on how much effort each task requires				
3	As a scrum team we need to create a scrum board to track the progress of the team	Effort:3 Reason: 1. Use Trello 2. create diff columns 3. Show what is done each day	Effort:3 Reason: 1. Break down the tasks. 2. Allocate the tasks to specific days. 3. Update the table everyday 4. Record the table	Effort: 4 Reason: 1. decide on which member does what on each day of the sprint 2. create the scrum board 3.update the scrum board to show what we finished doing each day of the sprint	Effort:4 Reason:31. Use Trello 2. create diff columns 3. Show what is done each day . Allocate the tasks to specific days.	Effort:3 Reason: 1. Break down the tasks. 2. Allocate the tasks to specific days. 3. Update the table everyday 4. Record the table	Effort: 3.5 Reason: 1. 1.decide on which member does what on each day of the sprint 2. create the scrum board 3.update the scrum board to show what we finished doing each day of the sprint	Effort: Reason: Use Trello Create scrum board 2. create diff columns 3. Show what is done each day . Allocate the tasks to specific days.	Effort:3 Reason: 1.Decide on which member does what on each day of the sprint 2. Create the scrum board 3.Update the scrum board to show what we finished doing each day of the sprint	Effort: 3 Reason: 1. decide on which member does what on each day of the sprint 2. create the scrum board 3.update the scrum board to show what we finished doing each day of the sprint	3
14	As a scrum team we need to create burndown charts for sprint 1 and 2	Effort:2 Reason: 1. Create work time available 2. Calculate time taken in each day 3. Plot the burndown chart	Effort:1.5 Reason: 1. Refer the work time available. 2. The approximate number of hours is noted. 3. Calculate the original number of hours spent 4. Create the chart	Effort: 1 Reason: 1. Calculate the ideal hours the team will work on IslandFurniture a day 2. Calculate the actual hours the team worked on IslandFurniture each day 3. Input all the values into a graph to create the burndown charts	Effort:2 Reason: 1. Create work time available 2. Calculate time taken in each day 3. Plot the burndown chart	Effort:2 Reason: 1. Refer the work time available. 2. The approximate number of hours is noted. 3. Calculate the original number of hours spent 4. Create the chart	Effort: 1 Reason: 1. 1.Calculate the ideal hours the team will work on IslandFurniture a day 2. calculate the actual hours the team worked on IslandFurniture each day 3. input all the values into a graph to create the burndown charts	Effort: Reason:	Effort: Reason:	Effort: Reason:	2

9	As a scrum team we need to create sequence diagrams for the login and viewing user profile, editing user profile including change password and sales history in the change request form	Effort:4 Reason: 1. Need to run the website and inspect to see from which file the code is running 2. Check what are the middlewares are being used 3. Need to check what are the dependencies	Effort:4 Reason: 1. Need to run the website and inspect to see from which file the code is running 2. Check what are the middlewares are being used 3. Need to check what are the dependencies	Effort: 3 Reason: 1. identify which parts of the codes the login & viewing of user profile, editing user profile and sales history uses 2. follow the flow in the codes and create the sequence diagram	Effort:3 Reason: 1. Need to run the website and inspect to see from which file the code is running 2. Check what are the middlewares are being used 3. Need to check what are the dependencies	Effort:4 Reason: 1. Need to run the website and inspect to see from which file the code is running 2. Check what are the middlewares are being used 3. Need to check what are the dependencies	Effort:4 Reason: 1. identify which parts of the codes the login & viewing of user profile, editing user profile and sales history uses 2. inspect each function in the code 3. create the sequence diagram	Effort:4 Reason: 1. Need to run the website and inspect to see from which file the code is running 2. Check what are the middlewares are being used 3. Need to check what are the dependencies	Effort:5 Reason: 1. Need to run the website and inspect to see from which file the code is running 2. Check what are the middlewares are being used 3. Need to check what are the dependencies 4. Identify the actor involved 5. The timeline for per process to happen 6. Need 3 sequence diagram for 3 functions.	Effort:5 Reason: 1. Identify which parts of the codes the login & viewing of user profile, editing user profile and sales history uses 2. inspect each function in the code 3. create the sequence diagram	5
10	As a scrum team we need to create a new GitHub repository so that the team can collaborate on the debugging of Island Furniture	Effort:1 Reason: 1. create the new repository and invite collaborators 2. git clone the repository into local machine 3. fork the repository 4. upload the original islandfurniture codes into the repository	Effort:1.5 Reason: 1. Need to create a github repository 2. collaborate with other team members	Effort: 1 Reason: 1. create the new repository and invite collaborators 2. git clone the repository into local machine 3. fork the repository 4. upload the original islandfurniture codes into the repository	Effort: Reason: 1. Need to create a github repository 2. collaborate with other team members	Effort:2 Reason: 1. Need to create a github repository 2. collaborate with other team members	Effort: 2 Reason: 1. Create the new repository and invite collaborators 2. git clone the repository into local machine 3. fork the repository 4. upload the original islandfurniture codes into the repository	Effort: Reason:	Effort: Reason:	Effort: Reason:	2

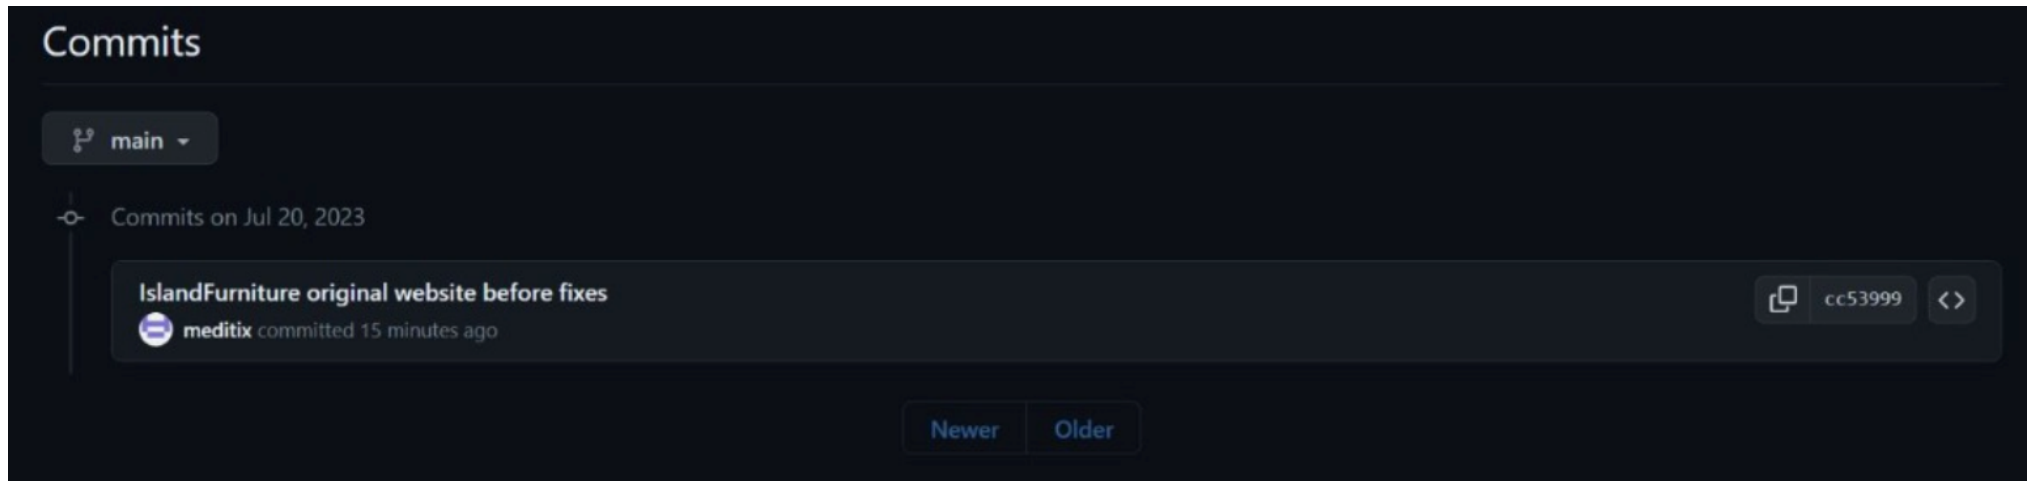

5	As a scrum team, we need to create use case specification for login and viewing user profile, editing user profile including change password and sales history for reference material.	Effort:2 Reason: 1. identify the actor involved in the use case, and write a description of what that use case is supposed to do 2. identify all possible expected flows, alternate flows and error flows	Effort:2 Reason: 1. Need to do use case specifications to 3 functions 2. Identify the actor, and 3 flows such as expected flow, alternate flow and error flow	Effort: 3 Reason: 1. identify the actor involved in the use case, and write a description of what that use case is supposed to do 2. identify all possible expected flows, alternate flows and error flows	Effort: Reason: 1. Need to do use case specifications to 3 functions 2. Identify the actor, and 3 flows such as expected flow, alternate flow and error flow	Effort: 2.5 Reason: 1. Need to do use case specifications to 3 functions 2. Identify the actor, and 3 flows such as expected flow, alternate flow and error flow 3. More than 1 alternate flows should be considered when doing use case specification	Effort: 3 Reason: 1. 1. Identify the actor involved in the use case, and write a description of what that use case is supposed to do 2. Identify all possible expected flows, alternate flows and error flows	Effort: Reason: 1. Need to do use case specifications to 3 functions 2. Identify the actor, and 3 flows such as expected flow, alternate flow and error flow 3. More than 1 alternate flows should be considered when doing use case specification	Effort:3 Reason: 1. Need to do use case specifications to 3 functions 2. Identify the actor, and 3 flows such as expected flow, alternate flow and error flow 3. More than 1 alternate flows should be considered when doing use case specification	Effort: 3 Reason: 1. 1. identify the actor involved in the use case, and write a description of what that use case is supposed to do 2. identify all possible expected flows, alternate flows and error flows	3
2	As a scrum team, we need to estimate the work time available for each of us to reach the estimated effort statistics.	Effort:1 Reason: 1. we need to decide and agree on the work time of each sprint	Effort:1 Reason: 1. Need to discuss and decide the work time available to list down the estimated work time accepted by all members	Effort: 0.5 Reason: 1. we need to decide and agree on the work time of each sprint	Effort:0.5 Reason: 1. Need to discuss and decide the work time available to list down the estimated work time accepted by all members	Effort:0.5 Reason: 1. Need to discuss and decide the work time available to list down the estimated work time accepted by all members	Effort: 0.5 Reason: 1. we need to decide and agree on the work time of each sprint	Effort: Reason:	Effort: Reason:	Effort: Reason:	0.5
15	As a scrum team, we want to check if there are other functions that needs to be debugged	Effort: Reason: 1. Look through islandfurniture website and test all the functions to check if there are any errors 2. look through the codes to see if anything	Effort:4 Reason: 1. Need to test the websites for other potential issues and area of improvements	Effort: 5 Reason: 1. Look through islandfurniture website and test all the functions to check if there are any errors 2. look through the codes to see if anything	Effort:5 Reason: 1. Need to test the websites for other potential issues and area of improvements 2. Testing the areas that needs	Effort:5 Reason: 1. Need to test the websites for other potential issues and area of improvements	Effort: 6 Reason: 1. 1. look through islandfurniture website and test all the functions to check if there are any errors 2. look through the codes to see if anything	Effort: Reason: 1. Look through islandfurniture website and test all the functions to check if there are any errors	Effort:6 Reason: 1. Need to test the websites for other potential issues and area of improvements	Effort: 6 Reason: 1. 1. look through islandfurniture website and test all the functions to check if there are any errors 2. look through the codes to see if anything	6

		needs to be fixed	2. Testing the areas that needs area of improvements 3. Debugging the additional bugs	needs to be fixed	area of improvements 3. Debugging the additional bugs	2. Day 3

The screenshot displays a Jira Scrum Board with the following columns and tasks:

- Product Backlog** (5 tasks):
 10. Create a new GitHub repository so that the team can collaborate on the debugging of Island Furniture
 11. Debugging for Logging and Viewing of User Profile.
 12. Debugging for the editing of user profile including change password
 13. Debugging for Sales history.
 14. Create burndown chart for Sprint 1 and Sprint 2
- Backlog** (3 tasks):
 7. Complete the test case for editing of user profile including change password
 8. Complete the test case for sales history to determine if different features
 9. Create sequence diagrams for the login and viewing user profile, editing user profile including change password and sales history
- In Progress** (2 tasks):
 5. Create use case specification for login and viewing user profile, editing user profile including change password and sales history
 6. Complete test case for Logging and viewing of the User Profile
- Completed (Sprint1)** (4 tasks):
 1. Do effort estimation to determine the size of the task.
 2. Create the work time available for both our sprints,
 3. Create a scrum board to track the progress of the team
 4. Create 3 user story card for logging and viewing of user profile, editing user profile including change password and sales history
- Completed (Sprint 2)** (1 task):
 - + Add a card

Each column has a '+ Add a card' button at the bottom. The board interface includes a top navigation bar with options like 'workspace visible', 'Board', 'Power-Ups', 'Automation', 'Filter', and 'Share'.

Day 4

The screenshot displays a Scrum Board interface with the following columns and tasks:

- Product Backlog**
 - 10. Create a new GitHub repository so that the team can collaborate on the debugging of Island Furniture
 - 11. Debugging for Logging and Viewing of User Profile.
 - 12. Debugging for the editing of user profile including change password
 - 13. Debugging for Sales history.
 - 14. Create burndown chart for Sprint 1 and Sprint 2
- Backlog**
 - 9. Create sequence diagrams for the login and viewing user profile, editing user profile including change password and sales history
- In Progress**
 - 7. Complete the test case for editing of user profile including change password
 - 8. Complete the test case for sales history to determine if different features
- Completed (Sprint1)**
 - 3. Create a scrum board to track the progress of the team
 - 4. Create 3 user story card for logging and viewing of user profile, editing user profile including change password and sales history
 - 5. Create use case specification for login and viewing user profile, editing user profile including change password and sales history
 - 6. Complete test case for Logging and viewing of the User Profile
- Completed(Sprint 2)**
 - both our sprints,

Each column includes an "Add a card" button at the bottom. The interface also features a top navigation bar with "Scrum Board", "Workspace visible", "Board", "Power-Ups", "Automation", "Filter", "Share", and a user profile icon.

8.2 Sprint 2

Start of sprint 2

Day 1

Day 2

The Scrum board displays the following tasks across four columns:

- Sprint 2 Backlog:**
 - Sales history** (green progress bar): 5. Fix the displaying of sales history by using for loop to loop through the order array.
 - Progress bar** (blue progress bar): 14. Create burndown chart for Sprint 1 and Sprint 2
 - 6. Fix additional debugs
- In Progress:**
 - View and edit profile information** (teal progress bar): 1. add route /api/getMember to memberProfile.html
 - View and edit profile information** (teal progress bar): 2. In memberProfile.html add value="" to all forms
 - View and edit profile information** (teal progress bar): 3. Add id=country 1 to access the selected country of the user instead of the empty default.
 - View and edit profile information** (teal progress bar): 4. Add selected tag to the id-country1 to select it by default when user views their profile.
- Completed (Sprint1):**
 - 2. Create the work time available for both our sprints,
 - 3. Create a scrum board to track the progress of the team
 - 4. Create 3 user story card for logging and viewing of user profile, editing user profile including change password and sales history
 - 6. Complete test case for Logging and viewing of the User Profile
 - 5. Create use case specification for login and viewing user profile, editing user profile including change password and sales history
- Completed(Sprint 2):**
 - Progress bar** (orange progress bar): Create a new GitHub repository so that the team can collaborate on the debugging of Island Furniture

Day 3

The Kanban board is organized into four columns, each representing a different stage of the development process. The 'Sprint 2 Backlog' column contains two task cards. The 'In Progress' column has one card with a 'Sales history' label. The 'Completed (Sprint1)' column lists four tasks. The 'Completed(Sprint 2)' column contains three cards, each with a 'View and edit profile information' label and specific implementation details.

Sprint 2 Backlog

- 14. Create burndown chart for Sprint 1 and Sprint 2
- 6. Fix additional debugs
- + Add a card

In Progress

- Sales history**
- 5. Fix the displaying of sales history by using for loop to loop through the order array.
- + Add a card

Completed (Sprint1)

- 2. Create the work time available for both our sprints,
- 3. Create a scrum board to track the progress of the team
- 4. Create 3 user story card for logging and viewing of user profile, editing user profile including change password and sales history
- 6. Complete test case for Logging and viewing of the User Profile
- 5. Create use case specification for login and viewing user profile, editing user profile including change password and sales history
- + Add a card

Completed(Sprint 2)

- that the team can collaborate on the debugging of Island Furniture
- View and edit profile information**
- 1. add route /api/getMember to memberProfile.html
- View and edit profile information**
- 2. In memberProfile.html add value="" to all forms
- View and edit profile information**
- 3. Add id=country 1 to access the selected country of the user instead of the empty default.
- View and edit profile information**
- 4. Add selected tag to the id-country1 to select it by default when user views their profile.
- + Add a card

Day 4

The Kanban board is organized into four columns, each with a title and a list of tasks or cards. The 'In Progress' column includes a burndown chart. The 'Completed' columns show tasks that have been finished in previous sprints.

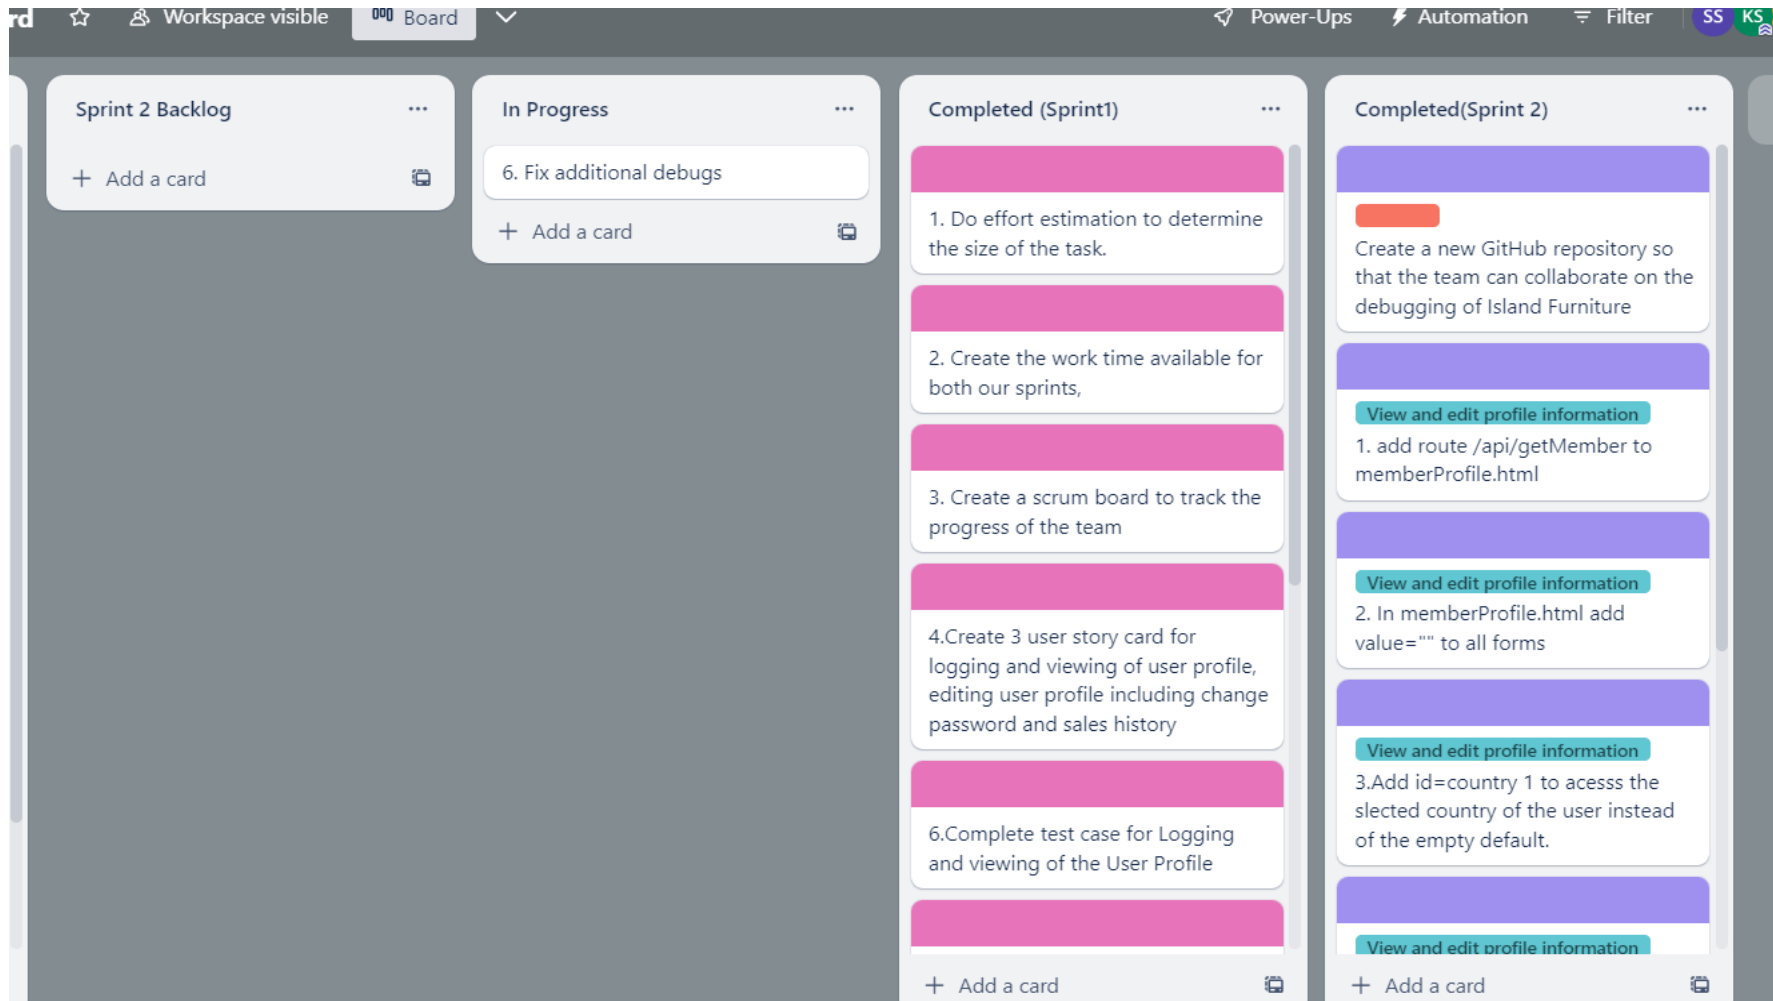

Sprint 2 Backlog	In Progress	Completed (Sprint1)	Completed(Sprint 2)
6. Fix additional debugs	14. Create burndown chart for Sprint 1 and Sprint 2	2. Create the work time available for both our sprints,	memberProfile.html
+ Add a card	+ Add a card	3. Create a scrum board to track the progress of the team	View and edit profile information 2. In memberProfile.html add value="" to all forms
		4. Create 3 user story card for logging and viewing of user profile, editing user profile including change password and sales history	View and edit profile information 3. Add id=country 1 to access the selected country of the user instead of the empty default.
		6. Complete test case for Logging and viewing of the User Profile	View and edit profile information 4. Add selected tag to the id-country1 to select it by default when user views their profile.
		5. Create use case specification for login and viewing user profile, editing user profile including change password and sales history	Sales history 5. Fix the displaying of sales history by using for loop to loop through the order array.
		+ Add a card	+ Add a card

Day 5

The Kanban board is organized into four columns, each with a header, a list of tasks, and an 'Add a card' button at the bottom.

- Sprint 2 Backlog**: Contains one task: '+ Add a card'.
- In Progress**: Contains one task: '6. Fix additional debugs'.
- Completed (Sprint1)**: Contains five tasks:
 - 2. Create the work time available for both our sprints,
 - 3. Create a scrum board to track the progress of the team
 - 4.Create 3 user story card for logging and viewing of user profile, editing user profile including change password and sales history
 - 6.Complete test case for Logging and viewing of the User Profile
 - 5.Create use case specification for login and viewing user profile, editing user profile including change password and sales history
- Completed(Sprint 2)**: Contains four tasks:
 - value="" to all forms
 - View and edit profile information
3.Add id=country 1 to accesss the slected country of the user instead of the empty default.
 - View and edit profile information
4. Add selected tag to the id-country1 to select it by default when user views their profile.
 - Sales history
5. Fix the displaying of sales history by using for loop to loop through the order array.
 - 14. Create burndown chart for Sprint 1 and Sprint 2

End of Sprint 2

9 Burndown Charts

9.1 Sprint 1

Days	1	2	3	4	5	6
Actual	27	24	17.4	12.4	5.9	0
Ideal	27	21.6	16.2	10.8	5.4	0

9.2 Sprint 2

Days	1	2	3	4	5	6
Actual	34	30.1	19.6	14	5	0
Ideal	34	27.4	20.8	14.2	6.6	0

10 Code Modifications

10.1 Logging and Viewing of User Profile & Edit User Profile including change password.

1. add route /api/getMember to memberProfile.html

```
// Get member info from sql database
fetch(new Request('/api/getMember?email=' + memberEmail,
{
  method: 'GET'
})).then(function (response) {
  return response.json();
}).then(function (member) {

  document.getElementById("name").value = member.name;
  document.getElementById("email").value = member.email;
  document.getElementById("phone").value = member.phone;
  document.getElementById("country1").innerHTML = member.city;
  document.getElementById("address").value = member.address;
  document.getElementById("securityQuestion").value = member.securityQuestion;
  document.getElementById("securityAnswer").value = member.securityAnswer;
  document.getElementById("age").value = member.age;
  document.getElementById("income").value = member.income;

}).catch(function (error) {
  console.log(error);
});
```

2. add value="" to all form

```
<h4>Personal Information</h4>
<div class="form-group">
  <label>Name</label>
  <input class="form-control" required="true" id="name" type="text" value="" />
</div>
<div class="form-group">
  <label>E-mail Address</label>
  <input class="form-control" required="true" id="email" value="" disabled />
</div>
<div class="form-group">
  <label>Phone</label>
  <input class="form-control" required="true" pattern="[0-9]*"
    title="Numbers only" type="text" id="phone" value="" />
</div>
<div class="form-group">
  <label>Country</label>
```

3. Add id=country 1 to access the selected country of the user instead of the empty default.
4. Add selected tag to the id-country1 to select it by default when user views their profile.

```
<div class="form-group">
  <label>Country</label>
  <select id="country">
    <option id="country1" disabled selected hidden></option>
    <option value="Afghanistan">Afghanistan</option>
  </select>
</div>
```

10.3 Show description of selected furniture or retail product in product details

In furnitureDetailsProduct.html

1. fetch the data for furniture name, price and description using document.getElementById.
2. document.getElementById will be referenced to the specific id created for the name, description and price.
3. add dollar sign(\$) after <p> tag and add inline style for the <p></p> used to fetch the price data with color:#cc3b33
4. add toFixed(2) to get the price with exactly 2 decimal places(real number) and remove the '00' (string) from html tag to display real decimal numbers.

```

if(memberEmail != null && memberEmail != '') {
    document.getElementById("addToCartBtn").innerHTML = '<button class="btn btn-primary" onclick="addToCart(\'\'
+ furniture.sku + '\',\'\' + furniture.id + '\',\' + furniture.price + ',\'\' + furniture.name + '\',\'\'
+ furniture.imageUrl + '\')">Add To Cart</button>';
}
document.getElementById("furnitureName").innerHTML = furniture.name;
document.getElementById("price").innerHTML = '<p style="color:#cc3b33;">$' + (furniture.price).toFixed(2) + '</p>';
document.getElementById("description").innerHTML = furniture.description;
document.getElementById("categoryLink").innerHTML = furniture.category;
document.getElementById("categoryLink").setAttribute('href', '/B/' + countryPrefix
+ '/furnitureCategory.html?cat=' + encodeURIComponent(furniture.category));

var selectOptions = '<option></option>';
var storeID = currentUrl.searchParams.get("storeID");
var storesInCountry = JSON.parse(localStorage.getItem('storesInCountry'));
for (i = 0; i < storesInCountry.length; i++) {
    var store = storesInCountry[i];
    if(store.id == storeID) {
        selectOptions += '<option selected value="' + store.id + '">' + store.name + '</option>';
    }
}

```

In retailProductDetails.html

1. fetch the data for retail product name, price and description using document.getElementById.
2. document.getElementById will be referenced to the specific id created for the name, description and price.
3. add dollar sign(\$) after <p> tag and add inline style for the <p></p> used to fetch the price data with color:#cc3b33
4. add toFixed(2) to get the price with exactly 2 decimal places(real number) and remove the '00' (string) from html tag to display real decimal numbers.

```
//set retail product details
document.getElementById("productImg").setAttribute('src', product.imageUrl);

document.getElementById("productCategory").innerHTML = product.category;
document.getElementById("productCategory").setAttribute('href', '/B/' + countryPrefix
+ '/retailProductsCategory.html?cat=' + encodeURIComponent(product.category));

//adjustments
document.getElementById("productName").innerHTML = product.name
document.getElementById("productPrice").innerHTML = '<p style="color:#cc3b33;">$'+(product.price).toFixed(2)+'</p>'
document.getElementById("productDesc").innerHTML = product.description

var selectOptions = '<option></option>';
var storeID = currentUrl.searchParams.get("storeID");
var storesInCountry = JSON.parse(localStorage.getItem('storesInCountry'));
for (i = 0; i < storesInCountry.length; i++) {
    var store = storesInCountry[i];
    if(store.id == storeID) {
        selectOptions += '<option selected value="' + store.id + '">' + store.name + '</option>';
    }
    else {
```

Before fix(furnitureProductDetails)

After fix (furnitureProductDetails)

The screenshot displays a web browser window with multiple tabs open, including 'Display all...', 'SP Collaborati...', 'Chapter 3', 'Chapter 4', 'Chapter 5', 'Island Furni...', and '(3) WhatsA...'. The address bar shows the URL: `http://localhost:8081/B/SG/furnitureProductDetails.html?sku=F_TD_01`. The browser's toolbar includes icons for back, forward, refresh, search, and other functions. Below the browser window, the website header features the 'ISLAND FURNITURE' logo on the left and navigation links for 'Store Location', 'Login/Register', and 'Contact Us' on the right. A secondary navigation bar contains 'VIRTUAL STORE' and 'ALL DEPARTMENTS'. The main content area has a dark banner with the word 'Furnitures'. Below this, the product 'LINMON' is showcased. On the left, a 3D rendering of a white rectangular table with four legs is shown. To the right of the image, the product name 'LINMON' is displayed in large, bold letters, followed by the price '\$100.00'. A 'Description' section states: 'Pre-drilled holes for legs, for easy assembly. Adjustable feet make the table stand steady also on uneven floors'. Below the description, the category 'Tables & Desks' is listed. Further down, there is a 'View Item Availability' dropdown menu and a red 'Check Item Availability' button. At the bottom of the page, a dark banner contains the text 'Get in Touch'.

11 Reference Material

11.1 Use case specifications

11.1.1 Login & viewing user profile

Name of Use Case	Login & viewing user profile
Brief Description	User logs in with registered account and is redirected to user profile page
Actor	User
Expected Flow	<ol style="list-style-type: none"> 1. User input their login details and click “Login” button 2. On successful login, user will then be redirected to the “User Profile” page 3. On the top right corner of this page member can view “Welcome member_name!” (eg. “Welcome Jun Wei!”) 4. On the “User Profile” page, user should be able to see all their account details, including: name, email, phone number, country, address, challenge question, challenge answer, age, and income.
Alternate Flow	<ol style="list-style-type: none"> 1. User input their login details and click “Login” button. 2. On successful login, user will then be directed to the memberProfile.html page. 3. On the top right corner of this page member can view “Welcome member_name!” Eg: “Welcome JunWei!” 4. On the top right corner of this page member can click “Profile” button to view their user profile.
Error Flow	<ol style="list-style-type: none"> 1. User input wrong login details and click “Login” button 2. Prompt will show up saying “Login fail. Email or password is incorrect.”

11.1.2 Edit user profile including change password

Name of Use Case	Edit user profile including change password
Brief Description	User can edit their account details in the user profile page. They are also able to change password from this page, but it is not required.
Actor	User
Expected Flow	<ol style="list-style-type: none"> 1. User input their login details and click “Login” button 2. On successful login, user will then be redirected to the “User Profile” page 3. On the top right corner of this page member can view “Welcome member_name!” (eg. “Welcome Jun Wei!”) 4. On the “User Profile” page, user should be able to see all their account details, including: name, email, phone number, country, address, challenge question, challenge answer, age, and income. 5. Member will enter old password , new password and re-enter new password on the respective fields. 6. Member will click submit button to change the password. 7. After clicking the button message: “Successfully updated!” will be shown on top of the memberProfile.html page
Alternate Flow 1	<ol style="list-style-type: none"> 1. User input their login details and click “Login” button. 2. On successful login, user will then be directed to the memberProfile.html page. 3. On the top right corner of this page member can view “Welcome member_name!” Eg: “Welcome Jun Wei!” 4. On the top right corner of this page member can click “Profile” button to view their user profile. 5. Member can edit their account details such as name, email, phone number, country, address, challenge question, challenge answer, age, and income. After editing, they can click on the “submit” button to apply the changes.
Alternate Flow 2	<ol style="list-style-type: none"> 1. User input their login details and click “Login” button. 2. On successful login, user will then be directed to the memberProfile.html page. 3. On the top right corner of this page member can view “Welcome member_name!” Eg: “Welcome Jun Wei!” 4. On the top right corner of this page member can click “Profile” button to view their user profile. 5. Member can edit their account details such as name, email, phone number, country, address, challenge question, challenge answer, age, and income, as well as change their password. 6. Member will enter old password , new password and re-enter new password on the respective fields. 7. After editing, they will click on the “submit” button to apply the changes. 8. Upon successful update, “Successfully Updated!” will be shown on top of the memberProfile.html page.

Error Flow 1	<ol style="list-style-type: none">1. User input letters into the phone number, age or income fields2. User will not be able to submit the form as only numbers are allowed in these fields3. Upon clicking "Submit", prompt will show up saying "Please match requested format"
Error Flow 2	<ol style="list-style-type: none">1. User input wrong old password2. Upon clicking "Submit", an alert will show up saying, "Old password is incorrect."
Error Flow 3	<ol style="list-style-type: none">1. User leaves one or more fields blank2. Upon clicking "Submit", prompt will show up saying "Please fill out this field"

11.1.3 Sales History

Name of Use Case	Sales History
Brief Description	User will be able to see the items they have previously bought from the IslandFurniture website
Actor	User
Expected Flow	<ol style="list-style-type: none"> 1. User input their login details and click “Login” button 2. On successful login, user will then be redirected to the “User Profile” page 3. On the “User Profile” page, user will click “Sales History” to navigate to the sales history page. 4. The user’s previous purchases will show up on the sales history page.
Alternate Flow	<ol style="list-style-type: none"> 1. User input their login details and click “Login” button 2. On successful login, user will then be redirected to the “User Profile” page 3. On the “User Profile” page, user will click “Sales History” to navigate to the sales history page. 4. User has not purchased anything from the website yet, sales history page will show “You do not have any sales history”

11.2 User story Card.

11.2.1 Authenticate/Login

As a	Member
I want	Authenticate with my username and password to login as a member
So that	I can gain access to the various online shopping-related function available

Confirmation

Acceptance Criteria

- User has to fill in email address.
- User has to fill in password
- User has to fill in password
-

Note

- User can press lost password to recover their password
- Email typed must be similar to the email used for registration
- After login , “Welcome {username}” will be shown

11.2.2 View and Edit Personal Particulars

As a	Member
I want	View and Edit my Perosnal Particles when needed
So that	I can update my personal particulars.

Confirmation

Acceptance Criteria

- User has registered account.
- User cannot leave any personal particular empty.

Note

- Phone number will only accept numbers
- Age only accept numbers
- Income will only accept numbers

11.2.3 Sales history

As a	Member
I want	to be able to view my sales history
So that	I can track my spendings

Confirmation

Acceptance Criteria

- Member log in and navigated to “User Profile” page
- Under “User Profile” member has to click “Sales History”
- By clicking “Sales History” the member can view the sales history
- Member can also view the order details including delivery details

Note

- Only purchased products will be shown
- Delivery details are address, postal code, name and contact details
- Order details are order number, date purchased and estimated delivery
